HTML, CSS, Bootstrap, JS

About Me

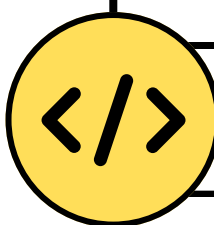

Junior developer with exceptional skills to work in a team. I am passionate about learning new technologies to continue growing professionally as a programmer. My short-term goal is to strengthen my work area and acquire new learnings, knowledge and experience in the field of programming. In the long term, I will continue with my postgraduate studies starting a specialization in programming and in cutting-edge technologies, to be recognized for my work, personal and professional performance and for my excellent relationships with customers and employers.

Work Experience

Freelancer, Universidad de Ciencias Aplicadas y Ambientales U.D.C.A.

Project: Data Management Program (C#), 2021
Design and development of a program in C# for the efficient management of the data of university graduates; implementation of key functionalities, such as insertion, modification and retrieval of data, as well as the generation of customized reports.

Freelancer, Universidad de Ciencias aplicadas y Ambientales U.D.C.A.

Project: Communication and Information Control Portal for Graduates (HTML, CSS, JS), 2022
Design and development of an interactive website using HTML, CSS and JavaScript to facilitate communication and information control for graduates.

Education

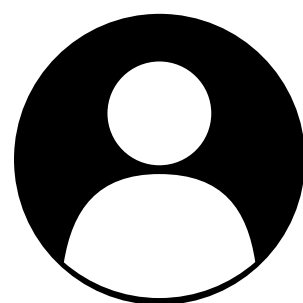

Higher Technician in Programming,
SENA (Servicio Nacional de Aprendizaje), 2018-2019

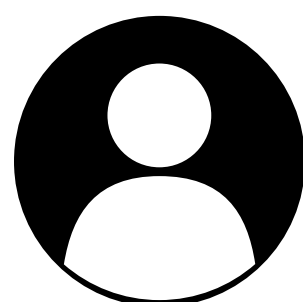

Bachelor's Degree in Systems Engineering,
UNAD (Universidad Nacional Abierta y a Distancia), Currently in 9th semester
